The financial statements of Providence Washington Insurance Company are presented on the basis of accounting practices prescribed or permitted by the Rhode Island Insurance Department.

The Rhode Island Insurance Department recognizes only statutory accounting practices prescribed or permitted by the state of Rhode Island for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under Rhode Island Insurance Law. The National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures Manual* version effective January 1, 2001, (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the state of Rhode Island. The Rhode Island Insurance Department has the right to permit specific practices that deviate from prescribed practices.

The Company, with the explicit permission of the Rhode Island Insurance Department recorded one specific reinsurance transaction in a manner that differs from prescribed accounting practices. Effective on the closing date of a change in ownership (October 1998), the Company entered into an adverse loss development reinsurance agreement. Under the terms of the agreement, the Company may cede to the reinsurer 100% of the aggregate ultimate net losses for the 1997 and prior accident years in excess of \$226.1 million (retention) up to a maximum limit of \$26 million. This transaction has been accounted for as prospective reinsurance pursuant to a permitted practice extended by the Rhode Island Insurance Department. During 2009, the Company's aggregate ceded paid loss and loss adjustment expenses recoverable under this treaty reached the maximum \$26 million limit, effectively concluding this treaty.

Reconciliations of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the state of Rhode Island for the nine months ending September 30, 2010 and December 31, 2009 are shown below:

(1) Carrying value for structured securities have been determined in accordance with the guidelines provided by the NAIC. Fair value is determined using a pricing hierarchy starting with a widely accepted pricing vendor, followed by external broker/dealers, Bloomberg, analytic modeling and a benchmark to index model.

(2) Our asset manager uses a proprietary model for loss assumptions and widely accepted models for prepayment assumptions in valuing mortgage backed and asset-backed securities with inputs from major third party data providers. It combines the effects of interest rates, volatility, and prepayment speeds based on Monte Carlo simulation with credit loss analysis and resulting effective analytics (spreads, duration, convexity) and cash-flows are reported to clients on a monthly basis. Model assumptions are specific to asset class and collateral types and are regularly evaluated and adjusted where appropriate.

(3) Credit risk concentrations are evaluated in our base security analysis through exposure stratification of the collateral attributes. We then apply an appropriate credit default curve reflecting our forecasted expectations of future defaults and losses.
