## NOTES TO FINANCIAL STATEMENTS

### 1. Summary of Significant Accounting Policies

#### (A) Accounting Practices

The financial statements of York Insurance Company are presented on the basis of accounting practices prescribed or permitted by the Rhode Island Insurance Department.

The Rhode Island Insurance Department recognizes only statutory accounting practices prescribed or permitted by the state of Rhode Island for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under Rhode Island Insurance Law. The National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures Manual* version effective January 1, 2001, (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the state of Rhode Island. The Rhode Island Insurance Department has the right to permit specific practices that deviate from prescribed practices.

Reconciliations of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the state of Rhode Island for the twelve months ending December 31, 2009 and 2008 are shown below:

	December 31, 2010	December 31, 2009

Statutory Surplus, NAIC SAP	\$ <u>10,388,690</u>	\$ <u>10,608,204</u>

#### (B) Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

#### (C) Accounting Policy

Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

Short-term investments are stated at amortized cost.

Bonds not backed by other loans are stated at amortized cost using the interest method. Non-investment grade bonds are stated at the lower of amortized value or fair value.

Common stocks at market except that investments in stocks of uncombined subsidiaries and affiliates in which the Company has an interest of 20% or more are carried on the equity basis.

Redeemable preferred stocks are stated at amortized value. Perpetual preferred stocks are stated at fair value. Non-investment grade preferred stocks are stated at the lower of amortized value or fair value.

Loan-backed bonds and structured securities are stated at either amortized cost or the lower of amortized cost or fair market value. The constant yield scientific method including anticipated prepayment assumptions is used to value all securities. Changes in current prepayment assumptions are accounted for using the prospective method.

The Company anticipates investment income as a factor in the premium deficiency calculation.

Loss and loss adjustment expense reserves are estimates that provide for the ultimate expected cost of settling unpaid losses and claims reported at each balance sheet date. Losses and claims incurred but not reported, as well as expenses required to settle losses and claims, are established on the basis of various criteria, including historical cost experience and anticipated costs of servicing reinsured and other risks. Considerable judgment is required to evaluate claims and establish estimated claim liabilities, particularly with respect to certain lines of business, such as reinsurance assumed, or certain types of claims, such as environmental and asbestos liabilities. The environmental and asbestos exposures do not lend themselves to traditional methods of loss development determination and, therefore, reserve estimates related to these exposures may be considerably less reliable than for other lines of business. The Company believes that overall reserving practices have been consistently applied, and that its aggregate net reserves have resulted in reasonable approximations of the ultimate net costs of claims incurred. These estimates are continually reviewed and adjusted as necessary; such adjustments are reflected in current operations. The Company's liability for unpaid loss and loss adjustment expense is presented net of amounts recoverable from reinsurers.

The Company is a member of an affiliated group of companies which file a consolidated federal income tax return. Under the terms of an intercompany tax allocation agreement, the Company is allocated federal income taxes by applying the current regular federal tax rate to statutory results of operations modified by book versus tax adjustments. Alternative minimum taxes are allocated ratably to companies with taxable income.

Realized capital gains and losses on the sale of investments are determined on a specific identification method and are included in the determination of net income. Unrealized capital gains and losses resulting from changes in the valuation of investments at fair value are credited or charged directly to surplus.

The Company regularly evaluates investments based on current economic conditions, credit risk experience and other circumstances of the underlying securities. A decline in a security's net market value that is not a temporary fluctuation is recognized as a realized loss, and the cost basis of that security is reduced.

Premiums earned, loss and loss adjustment expenses incurred, unearned premiums, and the liability for losses and loss adjustment expenses are reflected net of reinsurance assumed from and ceded to other companies.

## NOTES TO FINANCIAL STATEMENTS

Land, building and equipment are carried at cost less accumulated depreciation and are reflected net of encumbrances. Depreciation is calculated on a straight-line basis over the allowable estimated useful lives of the assets.

The assets and liabilities of operations with foreign functional currencies are translated net into U.S. dollars at current exchange rates and the resulting adjustment recorded is reflected as a liability in the statutory financial statements. The resulting net translation adjustments for each period are included in surplus.

Model assumptions are specific to asset class and collateral types and are regularly evaluated and adjusted where appropriate.

In addition, the Company sponsors and has accrued for a noncontributory executive retirement benefit for a small number of former employees.

- (A) Extraordinary Items  
On May 27, 2004, the Board of Directors with the concurrence of shareholders voted to place the Company into self-administered managed runoff status. These actions were taken in response to declines in financial strength ratings and the inability to raise capital. The Company prepared a runoff plan which called for the cessation of writing new and renewal business at the earliest possible date. The runoff plan also calls for the Company to maintain sufficient staffing to perform all required functions related to policyholder services, billing and collection, claims administration and financial reporting. The Company is providing periodic updates to its domiciliary regulators.

At December 31, 2010 and 2009, the Company had admitted assets of \$147,647 and \$149,117, respectively in premiums receivable due from policyholders and agents. The Company routinely assesses the collectability of these receivables. Based upon Company experience, any uncollectible premiums receivable as of December 31, 2010 are not expected to exceed the nonadmitted amounts totaling \$-0- and, therefore, no additional provision for uncollectible amounts has been recorded. The potential for any additional loss is not believed to be material to the Company's financial condition.

  - (G) Subprime Mortgage Exposure  
The Company does not engage in subprime residential mortgage lending. The Company's exposure to subprime lending is limited to investments within the fixed maturity investment portfolio which contains securities collateralized by mortgages that have characteristics of subprime lending such as adjustable rate mortgages and alternative documentation mortgages. These investments are in the form of asset-backed securities (ABS) collateralized by subprime mortgages and collateralized mortgage obligations backed by alternative documentation mortgages. The total carrying value of these investments is approximately \$84,000, comprising approximately 0.5% of the Company's total fixed maturity portfolio.

## NOTES TO FINANCIAL STATEMENTS

22. Events Subsequent

The Company has evaluated subsequent events through January 31, 2011. The statutory reporting statements (annual statements) were issued on or about February 26, 2011.

23. Reinsurance

(A) Unsecured Reinsurance Recoverables

The Company has an unsecured aggregate recoverable for losses, paid and unpaid including IBNR, loss adjustment expenses and unearned premium with its parent, Providence Washington Insurance Company, that exceeds 3% of the policyholders' surplus. The gross recoverable and offsetting assumed payable arises from the pooling arrangement described in Note 26 and the net effect can be referenced in Schedule Y, Part 2, column 13.

(B) Reinsurance Recoverable in Dispute for the Year Ended December 31, 2010

The Company does not have reinsurance recoverable for paid losses and loss adjustment expenses that exceed 5% of policyholders' surplus for an individual reinsurer or 10% of policyholders' surplus in aggregate.

(C) Reinsurance Assumed and Ceded

25. Change in Incurred Losses and Loss Adjustment Expenses

During 2010, the Company has recorded its pool percentage (12%) share of a \$2.7 million development of prior year reserves. The Company entered self-administered runoff in May 2004. Due to the uncertainties associated with runoff, the Company previously adopted a prudent and conservative practice of recording loss and loss adjustment expense reserves over and above the Appointed Actuary's central estimate. During the ensuing years subsequent to runoff, the loss and loss adjustment expense reserves have behaved in a generally predictable manner and developed favorably. Five and a half years have now elapsed with documented patterns of savings. The Company began recording its loss and loss adjustment expense reserves to the Appointed Actuary's central estimate commencing with year-end 2008. That practice remains in effect for 2010. The lines of business experiencing the largest amount of development are Assumed Reinsurance (\$3.1 million), Other Liability (\$1.4 million) and Workers' Compensation (\$0.5 million). Partially offsetting the lines of business experiencing development was the Commercial Multiple Peril line with savings of \$2.0 million.

The Company does not have a material amount of retrospectively rated policies and accordingly no adjustments were made to premiums.

26. Intercompany Pooling Arrangements

A new pooling arrangement was established effective January 1, 1995. The lead company is Providence Washington Insurance Company and participation percentages are:

Company	NAIC Co. Code	Percentage
Providence Washington Insurance Company	24295	85%
York Insurance Company	24325	12%
American Concept Insurance Company	31909	3%

## NOTES TO FINANCIAL STATEMENTS

All lines of business and all types of business are subject to the pooling agreement. Prior to calculating the pooled results by company, all cessions to non-affiliated reinsurers of business subject to pooling are recorded on the books of the lead company. All participants in the pooling agreement are parties to the reinsurance agreements with non-affiliated reinsurers. The pooled parties have assigned and transferred all non-affiliated reinsurance rights and obligations to the pool's lead company per the terms of the pooling agreement. The provision for reinsurance (Schedule F - Part 7) is recorded in full on the books of the lead company in conformance with all non-affiliated ceded reinsurance being recorded on the lead company's books. The write-off of uncollectible reinsurance is shared by pool members in accordance with pooling participation percentages.

31. High Deductibles

As of December 31, 2010, the amount of reserve credit that has been recorded for high deductibles on unpaid claims was \$0.

As of December 31, 2010, the amount billed and recoverable for high deductibles on paid claims related to a business segment discontinued over ten years ago is immaterial. Over the last ten years, the Company has not issued policies with high deductible provisions.

32. Discounting of Liabilities for Unpaid Losses or Unpaid Loss Adjustment Expenses

The Company's liabilities for unpaid workers' compensation claims are discounted on a consolidated basis with affiliated companies and then pooled among the affiliated companies. The discounts shown below are the Company's pooled share. All discounting is done using a rate of 3.5%, as required by the State of Rhode Island.

Reserves for the indemnity portion of workers compensation claims have been discounted on a tabular basis using NCCI tables at 3.5%. In total, the December 31, 2010 and December 31, 2009 liabilities include \$364,080 and \$288,960 of indemnity discount, respectively. The amount of discount for Case versus IBNR indemnity reserves at December 31, 2010 is as follows:

SCHEDULE P LINES OF BUSINESS PART 1	TABULAR DISCOUNT INCLUDED IN SCHEDULE P,	
	CASE	IBNR
Workers' Compensation	\$ -0-	\$ 364,080

The Company does not discount any medical unpaid losses, nor does the Company discount on a non-tabular basis.

33. Asbestos/Environmental Reserves

The Company has exposure to environmental and asbestos claims. All such exposures from all affiliates are pooled together and then allocated back to the separate companies based on their participation percentages in the pooling arrangement. The Company's environmental and asbestos exposure arises from the Group's past sale of General Liability, Commercial Multi-Peril, and Commercial Automobile insurance as well as from past participation in Assumed Reinsurance Pools. Regarding the direct exposure, the Group estimates the full impact of the environmental and asbestos exposure by establishing full case-basis reserves on all known claims and by computing incurred but not reported losses based on historical experience.

As respects the environmental and asbestos liability arising from assumed reinsurance, the Group was a participant in a pool of approximately fifty assumed reinsurance treaties which were discontinued in 1987. One of these treaties involves a small share of the ECRA pool. The participation in each treaty, although small (ranging from one-half of one percent to four percent), varied substantially by year with not all treaties being in-force for all years.

During 2010, it was determined that a portion of asbestos and environmental data had been misclassified between the two business classes. This has resulted in a reinstatement of the five most recent calendar years. The Company's pooled share of environmental and asbestos losses for the five most recent calendar years, shown separately on a direct, assumed and net basis, are as follows:
