NOTES TO FINANCIAL STATEMENTS

1. Nature of Operations and Summary of Significant Accounting Policies

Nature of Operations

The Metropolitan Group Property and Casualty Insurance Company (“the Company”) is incorporated under the laws of the State of Rhode Island. The Company is a wholly owned subsidiary of Metropolitan Property and Casualty Insurance Company (“MPC”), domiciled in Rhode Island, which is a wholly owned subsidiary of MetLife, Inc. (“MetLife”), incorporated in the State of Delaware, a public company whose shares are traded on the New York Stock Exchange. As of December 31, 2013, the Company owned 100% of the outstanding common stock of Metropolitan Reinsurance Company (UK) Limited, an affiliated unconsolidated subsidiary.

The Company is engaged, principally in the United States, in the property-liability insurance business. The Company’s primary ongoing business is the sale of private passenger automobile, homeowners and personal umbrella insurance.

The Company is authorized to sell property-liability insurance in 41 states and the District of Columbia. The top geographic locations for statutory direct earned premiums were Connecticut, Georgia, Illinois, Michigan, New Jersey, and New York for the year ended December 31, 2013. No other jurisdiction accounted for more than 5% of statutory direct earned premiums.

The Company has exposure to catastrophes, which are an inherent risk of the property-liability insurance business, which have contributed, and will continue to contribute, to material year-to-year fluctuations in the Company’s results of operations and financial position. The Company defines a catastrophe as an event that produces a number of claims in excess of a preset per-event threshold of average claims in a specific area. The Company also has exposure to environmental, asbestos, and other mass tort claims.

Summary of Significant Accounting Policies

A. Accounting Practices

The Company’s statement is presented on the basis of accounting practices prescribed or permitted by the Rhode Island Department of Business Regulation, Insurance Division (“RI DBR, Insurance Division”). While the RI DBR, Insurance Division has the right to permit specific practices that may deviate from prescribed practices, the Company did not follow any permitted practices other than those prescribed by the RI DBR, Insurance Division.

The RI DBR, Insurance Division has adopted the National Association of Insurance Commissioners’ statutory accounting practices (“NAIC SAP”) as the basis of its statutory accounting practices.

Accounting practices and procedures of the NAIC are a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America (“GAAP”). The more significant differences are as follows:

- (1) Investment in bonds are generally carried at amortized cost, while under GAAP, they are carried at either amortized cost or fair value based on their classification according to the Company’s ability and intent to hold or trade the securities;
- (2) Investments in common stocks are valued as prescribed by the Securities Valuation Office (“SVO”) of the NAIC, while under GAAP, common stocks are reported at market value;
- (3) Acquisition costs, such as commissions and other costs related to acquiring new business, are expensed as incurred, while under GAAP, they are deferred and amortized to income as premiums are earned or in relation to estimated gross profits;
- (4) Prior to January 1, 2001, a Federal income tax provision was made only on a current basis for Statutory Accounting, while under GAAP, a provision was also made for deferred taxes on temporary differences between the financial reporting and tax bases of assets and liabilities. Subsequent to January 1, 2001, NAIC SAP requires an amount to be recorded for deferred taxes however, there are limitations as to the amount of deferred tax assets that may be reported as “admitted assets”;
- (5) Assets are reported under NAIC SAP as “admitted-asset” value and “non-admitted” assets are excluded through a charge against surplus, while under GAAP, “non-admitted assets” are reinstated to the balance sheet, net of any valuation allowance;
- (6) The change in provision for reinsurance is charged or credited directly through surplus under NAIC SAP, while this provision is not recognized for GAAP purposes;

NOTES TO FINANCIAL STATEMENTS

- (7) The balance sheet under NAIC SAP is reported net of reinsurance, while under GAAP, the balance sheet reports reinsurance recoverables, including amounts related to losses incurred but not reported, and prepaid reinsurance premium as assets;
- (8) Comprehensive income and its components are not presented in the statutory financial statements;
- (9) Subsidiaries are included as common stock carried under the equity method, with the equity in net income of subsidiaries credited directly to the Company's surplus for NAIC SAP, while GAAP requires either consolidation or the equity in earnings of subsidiaries or net income of subsidiaries to be credited to the income statement; and
- (10) Goodwill under GAAP is calculated as the difference between the cost of acquiring the entity and the fair value of the assets received and liabilities assumed. Under NAIC SAP, goodwill is calculated as the difference between the cost of acquiring the entity and the reporting entity's share of the historical book value of the acquired entity. However, under NAIC SAP the amount of goodwill recorded as an "admitted asset" is subject to limitations. In June 2001, SFAS No. 142, Goodwill and Other Intangible Assets significantly changed the method of accounting for intangible assets. Previous authoritative guidance presumed that goodwill and all other intangible assets were wasting assets, and thus the amounts assigned them should be amortized in determining net income. SFAS No. 142 does not presume that those assets are wasting assets. Instead, goodwill and intangible assets that have indefinite useful lives will not be amortized but rather will be tested at least annually for impairment by comparing the fair values of those assets with their recorded amounts.

B. Use of Estimates

The preparation of financial statements in conformity with NAIC SAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

C. Accounting Policy

Premiums are generally recognized as revenue on a pro rata basis over the policy term. The portion of the premiums written applicable to the unexpired terms of the policies is recorded as unearned premiums.

- (1) Short-term investments are stated in the same manner as comparable longer-term investments described below.
- (2) Bonds not backed by other loans are generally stated at amortized cost unless they have a NAIC rating designation of 3, 4, 5 or 6 which are stated at the lower of amortized cost or fair value. Bonds not backed by other loans are amortized using the scientific method.
- (3) Common stocks of non-affiliates are stated at fair value. For investments in subsidiary, controlled or affiliated ("SCA") companies, see Note 1C(7).
- (4) Redeemable preferred stocks are generally stated at cost or amortized cost unless they have a NAIC rating designation of 3, 4, 5 or 6 which are stated at the lower of cost, amortized cost or fair value. Perpetual preferred stocks are generally stated at fair value unless they have a NAIC rating designation of 3, 4, 5 or 6 which are stated at the lower of cost or fair value.
- (5) The Company has no mortgage loans.
- (6) Mortgage-backed bonds included in bonds are generally stated at amortized cost using the scientific method unless they have a NAIC rating designation of 3, 4, 5 or 6 which are stated at the lower of amortized cost or fair value. Amortization of the discount or premium from the purchase of these securities considers the estimated timing and amount of prepayments of the underlying mortgage loans. Actual prepayment experience is periodically reviewed and effective yields are recalculated when differences arise between the prepayments originally anticipated and the actual prepayments received and currently anticipated. For credit-sensitive mortgage-backed and asset-backed bonds and certain prepayment-sensitive bonds (e.g., interest-only securities), the effective yield is recalculated on a prospective basis. For all other mortgage-backed and asset-backed bonds, the effective yield is recalculated on a retrospective basis.

For certain residential mortgage-backed securities ("RMBS"), both an initial and final NAIC designation is determined on a security-by-security basis based on a range of values published by the NAIC. The initial designation is used to determine the carrying value of the RMBS. RMBS with initial designations of 1 to 2 are stated at amortized cost while RMBS with initial designations of 3, 4, 5 or 6 are stated at the lower of amortized cost or fair value. The final designation calculation compares this carrying value with a range of values, resulting in a final NAIC designation reported herein, which is used for all other accounting and reporting purposes.

The NAIC adopted a revised rating methodology for loan-backed and structured securities, including asset-backed securities ("ABS"), which are not modeled. For these securities, the NAIC relies on the second lowest NAIC Credit Rating Provider ("CRP") rating to determine the initial NAIC designation. The second lowest CRP rating is used to determine the carrying value of the security, which is based on the NAIC's estimate of expected losses, using an NAIC published formula. The carrying value of the security determines its final NAIC designation, which is used for reporting in the annual statement. This revised methodology does not apply to NAIC 1 and NAIC 6 securities which are rated at the second lowest CRP designation.

- (7) The Company has no investments in subsidiary, controlled or affiliated ("SCA") companies.
- (8) The Company has no minor ownership interests in joint ventures, partnerships and limited liability companies.
- (9) For derivative accounting policy, see Note 8.
- (10) For premium deficiency reserve policy, see Note 30.
- (11) The liability for unpaid reported losses is based on a case by case estimate (case reserves) for most lines of business, for the other lines of business, unpaid losses are based on average "statistical" reserves. There is an additional overall estimate (supplemental reserves for several specific lines of business) based on the Company's past experience, this is also known as an additional reserve on known claims. A provision also is made for losses incurred but not reported on the basis of estimates and past experience modified for current trends and estimates of expenses for investigating and settling claims, reduced for anticipated salvage and subrogation. The liability for unpaid losses on business assumed is based in part on reports received from ceding companies.

Management believes that the liability for unpaid losses and loss adjustment expenses is adequate to cover ultimate unpaid losses and loss adjustment expenses incurred. However, such liability is necessarily based on estimates, and the ultimate liability may vary significantly from such estimates. In accordance with industry practice, the Company

NOTES TO FINANCIAL STATEMENTS

regularly reviews its estimated liability, and any adjustments are reflected in the period in which they become known. In accordance with guidelines established by the NAIC, the liability for unpaid losses at December 31, 2013 is reported net of estimated salvage and subrogation recoverable.

The Company currently has asbestos and environmental impairment liability (“EIL”) loss reserves relating to the business written prior to 1990. The reserves related to these exposures are handled by a third party and the Company does not expect any adverse results from the asbestos and EIL due to a corresponding excess of loss contract.

(12) The Company has not modified its capitalization policy from the prior year end.

(13) The Company does not have pharmaceutical rebate receivables.

D. Loan-Backed Securities

(1) Prepayment assumptions were obtained from published broker dealer values and internal estimates.

(2) a. The Company did not recognize any other-than-temporary impairments (“OTTI”) on the basis of the intent to sell during the year ended December 31, 2013.

b. The Company did not recognize any OTTI on the basis of the inability or lack of intent to retain the investment in the security for a period of time sufficient to recover the amortized cost basis during the year ended December 31, 2013.

(3) As of December 31, 2013, the Company has not recognized any OTTI on its loan-backed securities based on cash flow analysis.

(4) At December 31, 2013, the estimated fair value and gross unrealized losses for loan-backed and structured securities, aggregated by length of time the securities have been in a continuous loss position are as follows:

a. The aggregate amount of unrealized losses:		
1. Less than 12 Months	\$104,222	
2. 12 Months or Longer	\$0	
b. The aggregate related fair value of securities with unrealized losses:		
1. Less than 12 Months	\$4,019,012	
2. 12 Months or Longer	\$0	

(5) The Company performs a regular evaluation, on a security-by-security basis, of its securities holdings in accordance with its OTTI policy in order to evaluate whether such investments are other-than-temporarily impaired. Management considers a wide range of factors about the security issuer and uses its best judgment in evaluating the cause of the decline in the estimated fair value of the security and in assessing the prospects for near-term recovery. Factors considered include fundamentals of the industry and geographic area in which the security issuer operates, as well as overall macroeconomic conditions.

Projected future cash flows are estimated using assumptions derived from management’s best estimates of likely scenario-based outcomes after giving consideration to a variety of variables that include, but are not limited to: (i) general payment terms of the security; (ii) the likelihood that the issuer can service the scheduled interest and principal payments; (iii) the quality and amount of any credit enhancements; (iv) the security’s position within the capital structure

NOTES TO FINANCIAL STATEMENTS

of the issuer; (v) possible corporate restructurings or asset sales by the issuer; and (vi) changes to the rating of the security or the issuer by rating agencies.

Additional considerations are made when assessing the unique features that apply to certain loan-backed and structured securities including, but not limited to: (i) the quality of underlying collateral; (ii) expected prepayment speeds; (iii) current and forecasted loss severity; (iv) consideration of the payment terms of the underlying assets backing the security; and (v) the payment priority within the tranche structure of the security.

For loan-backed and structured securities in an unrealized loss position as summarized in the immediately preceding table, the Company does not have the intent to sell the securities, believes it has the intent and ability to retain the security for a period of time sufficient to recover the carrying value of the security and, based on the cash flow modeling and other considerations as described above, believes these securities are temporarily impaired.

The contingency footnote has been prepared on a combined basis for MPC and its subsidiaries and affiliates. The Company is a wholly owned subsidiary of MPC.

A purported class action has been filed against MPC in Oklahoma. The suit claims breach of contract and fraud arising from the alleged use of preferred provider organizations to reduce medical provider fees covered by the medical claims portion of the insurance policy. MPC’s motion to dismiss the suit was denied. The plaintiff’s motion for class certification was denied. The plaintiff’s individual claims for bad faith and breach of contract remain.

A putative class action has been brought by an Arizona insured in Rhode Island federal court. The plaintiff alleges that the MPC has been making automobile total loss settlements in breach of its contract and in bad faith. The suit claims that MPC is breaching its contract by not honoring its V550 endorsement which provides full replacement cost coverage for vehicles that have been owned for less than one year and have been driven less than 15,000 miles. The court granted MPC’s motion to dismiss the claim for unjust enrichment and noted that the plaintiff had conceded that he will not pursue a separate tort claim for bad faith. MPC has been vigorously defending this action.

A punitive class action has been filed in Arkansas state court alleging that MPC breached the insurance contract and engaged in bad faith by utilizing the Colossus bodily injury evaluation tool. The purported class action included Arkansas insureds who made first party uninsured/underinsured bodily injury claims. The suit alleges that Colossus systematically undervalues these bodily injury claims. MPC has removed the case to federal court and is vigorously defending the action.

MPC has appealed to the Rhode Island Supreme Court a judgment for \$1,750,000 in favor of a Rhode Island body shop who alleged MPC engaged in abuse of process by instigating a criminal investigation into its practices. Allegations of tortious

NOTES TO FINANCIAL STATEMENTS

interference, malicious prosecution, and violation of the Rhode Island Deceptive Trade Practices Act were dismissed prior to the two-week trial. Arguments before the Court are expected during its 2013-2014 term.

A former Property and Casualty Specialist filed a national putative collective action in the United States District Court for the District of Arizona. The complaint alleges that MPC improperly classified Property and Casualty Specialists in violation of the Fair Labor Standards Act (the "FLSA"). The plaintiff seeks overtime compensation, interest, statutory penalties, reasonable attorneys' fees and litigation costs and damages. Others have joined the action by filing opt-in notices with the court. The court granted plaintiff's motion for conditional certification of the collective action, authorizing notice to certain present and former PCS's and discovery is underway.

Various litigation claims, and assessments against the Company, in addition to those discussed above and those otherwise provided for in the Company's financial statements, have arisen in the course of the Company's business, including but not limited to, in connection with its activities as an insurer, employer and taxpayer. Further, state insurance regulatory authorities and other federal and state authorities regularly make inquiries and conduct investigations concerning the Company's compliance with applicable insurance and other laws and regulations.

It is not feasible to predict or determine the ultimate outcome of all pending investigations and legal proceedings or provide reasonable ranges of potential losses, except as noted above in connection with specific matters. In some of the matters referred to above, very large and/or indeterminate amounts, including punitive and treble damages, are sought. Although in light of these considerations it is possible that an adverse outcome in certain cases could have a material adverse effect upon the Company's financial position, based on information currently known by the Company's management, in its opinion, the outcomes of such pending investigations and legal proceedings are not likely to have such an effect. However, given the large and/or indeterminate amounts sought in certain of these matters and the inherent unpredictability of litigation, it is possible that an adverse outcome in certain matters could, from time to time, have a material adverse effect on the Company's financial statements.

There were no assets and liabilities measured and reported at estimated fair value using significant unobservable (Level 3) inputs during the year ended December 31, 2013.

Transfers between Levels

Overall, transfers between levels occur when there are changes in the observability of inputs and market activity. Transfers into or out of any level are assumed to occur at the beginning of the period.

Transfers into or out of Level 3

Assets and liabilities are transferred into Level 3 when a significant input cannot be corroborated with market observable data. This occurs when market activity decreases significantly and underlying inputs cannot be observed, current prices are not available and/or when there are significant variances in quoted prices, thereby affecting transparency. Assets and liabilities are transferred out of Level 3 when circumstances changes such that a significant input can be corroborated with market observable data. This may be due to a significant increase in market activity, a specific event or one or more significant input(s) becoming observable.

(3) Transfers between levels are assumed to occur at the beginning of the period.

(4) Assets and Liabilities Measured and Reported at Estimated Fair Value at Reporting Date*Valuation Techniques and Inputs for Level 2 and Level 3 Assets and Liabilities by Major Classes of Assets and Liabilities:*

The Company determines the estimated fair value of its investments using primarily the market approach and the income approach. The use of quoted prices for identical assets and matrix pricing or other similar techniques are examples of market approaches, while the use of discounted cash flow (“DCF”) methodologies is an example of the income approach. The Company attempts to maximize the use of observable inputs and minimize the use of unobservable inputs in selecting whether the market or income approach is used.

The Company categorizes its financial assets and liabilities into a three-level hierarchy, based on the significant input with the lowest level in their valuation. The input levels are as follows. Level 1 - Unadjusted quoted prices for identical assets or liabilities in active markets that are readily and regularly obtainable. Level 2 - Quoted prices in markets that are not active or inputs that are observable either directly or indirectly. These inputs can include quoted prices for similar but not identical assets or liabilities other than quoted prices in Level 1. Level 3 - Unobservable inputs that are supported by little or no market activity and are significant to the determination of estimated fair value of the assets and liabilities. Unobservable inputs reflect the entity’s own assumptions about the assumptions that market participants would use in pricing the asset or liability.

Level 2 Measurements:

Bonds - State and political subdivision securities — included within U.S Special Revenue and Agencies - These securities are principally valued using the market approach. Valuation is based primarily on matrix pricing or other similar techniques using standard market observable inputs including benchmark U.S. Treasury yield or other yields, issuer ratings, broker-dealer quotes, issuer spreads and reported trades of similar securities, including those within the same sub-sector or with a similar maturity or credit rating.

B. The Company provides no other fair value information.

Assets and Liabilities

The methods and significant assumptions used to estimate the fair value of all financial instruments are presented below.

The Company defines fair value as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. In most cases, the exit price and the transaction (or entry) price will be the same at initial recognition.

The Company determines the estimated fair value of its investments using primarily the market approach and the income approach. The use of quoted prices for identical assets and matrix pricing or other similar techniques are examples of market approaches, while the use of discounted cash flow ("DCF") methodologies is an example of the income approach. The Company prioritizes the use of observable inputs over unobservable inputs.

The Company categorizes its financial assets and liabilities into a three-level hierarchy, based on the significant input with the lowest level in their valuation. The input levels are as follows. Level 1 - Unadjusted quoted prices for identical assets or liabilities in active markets that are readily and regularly obtainable. Level 2 - Quoted prices in markets that are not active or inputs that are observable either directly or indirectly. These inputs can include quoted prices for similar but not identical assets or liabilities other than quoted prices in Level 1. Level 3 - Unobservable inputs that are supported by little or no market activity and are significant to the determination of estimated fair value of the assets and liabilities. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing the asset or liability.

In general, investments classified within Level 3 use many of the same valuation techniques and inputs as described in the Level 2 discussions below. However, if key inputs are unobservable, or if the investments are less liquid and there is very limited trading activity, the investments are generally classified as Level 3. The use of independent non-binding broker quotations to value investments generally indicates there is a lack of liquidity or the general lack of transparency in the process to develop the valuation estimates generally causing these investments to be classified in Level 3.

Bonds, Cash, Cash Equivalents and Short-term Investments, Including Affiliated Securities

When available, the estimated fair value for bonds, including loan-backed and structured securities, are based on quoted prices in active markets that are readily and regularly obtainable. Generally, these investments are classified in Level 1. Generally, these are the most liquid of the Company's securities holdings and valuation of these securities does not involve management's judgment.

When quoted prices in active markets are not available, the determination of estimated fair value is based on market standard valuation methodologies, giving priority to observable inputs. The significant inputs to the market standard valuation methodologies for certain types of securities with reasonable levels of price transparency are inputs that are observable in the market or can be derived principally from or corroborated by observable market data. Generally, these investments are classified in Level 2.

When observable inputs are not available, the market standard valuation methodologies for determining the estimated fair value of certain types of securities that trade infrequently, and therefore have little or no price transparency, rely on inputs that are significant to the estimated fair value that are not observable in the market or cannot be derived principally from or corroborated by observable market data. These unobservable inputs can be based in large part on management's judgment or estimation, and cannot be supported by reference to market activity. Even though these inputs are unobservable, management believes they are consistent with what other market participants would use when pricing such securities and are considered appropriate given the circumstances. Generally, these investments are classified in Level 3.

Excluded from the disclosure are investments accounting for under the equity method including affiliated common stocks.

The estimated fair value for cash approximates carrying value and is classified as Level 1 given the nature of cash.

The use of different methodologies, assumptions and inputs may have a material effect on the estimated fair values of the Company's securities holdings.

Investment Income Due and Accrued

Due to the short-term nature of investment income due and accrued, the Company believes there is minimal risk of material changes in interest rates or credit of the issuer such that estimated fair value approximates carrying value.

22. Events Subsequent

The Company has evaluated events subsequent to December 31, 2013, through February 18, 2014, which is the date these financial statements were available to be issued, and have determined there are no material subsequent events requiring adjustment to or disclosure in the financial statements.

23. Reinsurance**A. Unsecured Reinsurance Recoverables**

- (1) The Company cedes 100% of its business to its parent, MPC (NAIC # 26298, Federal I.D. #13-2725441), as part of the 100% Restated Quota Share Reinsurance Agreement except for the run-off of a book of reinsurance business transacted through the Odyssey Reinsurance Company. Due to the Restated Quota Share Reinsurance Agreement, the Company has unsecured aggregate recoverable losses, paid and unpaid including IBNR, loss adjustment expenses, unearned premiums and contingent commissions in the amount of \$557,759,410.
- (2) In 2005, the Company reduced its Funds Held by \$85,758,300 for its third and final "participation in excess balances" based upon calculations made as of January 1, 2005 by an independent actuary. The fund release was the result of the reinsurance agreement between the Company and Odyssey Re (See Note 23. F.). Effective December 31, 2013, Metropolitan Group Property and Casualty Insurance Company (formerly Metropolitan Reinsurance Company) executed a novation with Clearwater Insurance Company, an authorized reinsurance affiliate of Odyssey Re domiciled in Delaware, and Hudson Re, an unauthorized reinsurer domiciled in Bermuda, whereby Clearwater replaced Hudson Re as the new retrocessionaire. The Company was not required to record a provision for reinsurance for the recoveries due from Clearwater Insurance Company in excess of the funds held balance since Clearwater is an authorized reinsurer. The transaction continues to be treated as a loss portfolio transaction. The reinsurance agreement for the ceded loss reserves is now between the Company and Clearwater Insurance Company while the excess of loss reinsurance agreement is between the Company and Odyssey Re.

F. Retroactive Reinsurance

Metropolitan Group Property and Casualty Ins. Co (formerly Met Re) wrote reinsurance lines of business prior to 1991. The Company has engaged in a complex transaction with Odyssey Re Holdings Corporation (formerly Skandia America Reinsurance Co) whereby all 1989 and prior reinsurance business reserves have been transferred to Odyssey Re for administration during the runoff status. The Company has retained the funds supporting the reserves and reduces its funds held as loss payments are made. The Company is protected from negative loss development on the reinsurance reserves by virtue of an additional excess of loss reinsurance contract with Odyssey Re.

The 1989 and prior reinsurance loss reserve transfer to Odyssey Re was done on an undiscounted basis for consideration of an equal amount as follows:

	Assumed	Ceded
a. Reserves Transferred:	\$ 0	\$ 327,174,389

The prior year reserves have decreased principally for the other liability Part 1H line of insurance. This is shown in Schedule P. The Company has no retrospectively rated policies.

27. Structured Settlements

- A. The Company has purchased annuities with the claimant as payee for which the Company has a contingent liability. The Company eliminated its loss reserves for these claims at the time the annuities were purchased. A contingent liability exists to the extent that the issuers of the annuity contracts become unable to fulfill their contractual obligations. The present value of all annuity contracts still in force at December 31, 2013 was \$2,583,941. If the Company became responsible for any payments under these annuities, such payments could possibly be reduced by reinsurance recoverables.

The Company does not expect any adverse results due to the 100% quota share reinsurance treaty and the corresponding excess of loss contract of the subsidiary. The Company remains contingently liable for all risks reinsured in the event the reinsurers are unable to meet their obligation under the agreements.

30.3 Totals.....	369,773,387	376,258,573	6,485,186

30.4 Describe the sources or methods utilized in determining the fair values:

Per Part 5, Section 1 of the SVO Purposes and Procedures Manual, Insurance companies can elect to not use prices provided by the NAIC. They can select any of 5 price sources, as defined in this section, and identify them in their appropriate schedule. MetLife and its affiliate insurance companies have chosen to not use market prices obtained from the NAIC. First an external quoted price is sought. In cases where in an external quoted price is not available, the fair value is internally estimated using present value or valuation techniques. Factors considered in estimating fair value include: coupon rate, maturity, estimated duration, call provisions, sinking fund requirements, credit rating, industry sector of the issuer and quoted market prices of comparable securities.

31.1 Was the rate used to calculate fair value determined by a broker or custodian for any of the securities in Schedule D? Yes [] No [X]

31.2 If the answer to 31.1 is yes, does the reporting entity have a copy of the broker's or custodian's pricing policy (hard copy or electronic copy) for all brokers or custodians used as a pricing source? Yes [] No []

31.3 If the answer to 31.2 is no, describe the reporting entity's process for determining a reliable pricing source for purposes of disclosure of fair value for Schedule D. Management is responsible for the determination of estimated fair value. The estimated fair value of publicly traded fixed maturity, equity and trading securities as well as short-term investments is determined by management after considering one of three primary sources of information: quoted market prices in active markets, independent pricing services, or independent broker quotations. The number of quotes obtained varies by instrument and depends on the liquidity of the particular instrument. Generally, we obtain prices from multiple pricing services to cover all asset classes and obtain multiple prices for certain securities.

32.1 Have all the filing requirements of the Purposes and Procedures Manual of the NAIC Securities Valuation Office been followed? Yes [X] No []
