NOTES TO FINANCIAL STATEMENTS

Note 1 - Summary of Significant Accounting Policies

A. Accounting Practices

The financial statements of York Insurance Company are presented on the basis of accounting practices prescribed or permitted by the Rhode Island Insurance Department.

The Rhode Island Insurance Department recognizes only statutory accounting practices prescribed or permitted by the state of Rhode Island for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under Rhode Island Insurance Law. The National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures Manual* version effective January 1, 2001, (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the state of Rhode Island. The Rhode Island Insurance Department has the right to permit specific practices that deviate from prescribed practices.

Reconciliations of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the state of Rhode Island for the twelve months ending December 31, 2013 and 2012 are shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

Short-term investments are stated at amortized cost.

Bonds not backed by other loans are stated at amortized cost using the interest method. Non-investment grade bonds are stated at the lower of amortized value or fair value.

Common stocks at market except that investments in stocks of uncombined subsidiaries and affiliates in which the Company has an interest of 20% or more are carried on the equity basis.

Redeemable preferred stocks are stated at amortized value. Perpetual preferred stocks are stated at fair value. Non-investment grade preferred stocks are stated at the lower of amortized value or fair value.

Loan-backed bonds and structured securities are stated at either amortized cost or the lower of amortized cost or fair market value. The constant yield scientific method including anticipated prepayment assumptions is used to value all securities. Changes in current prepayment assumptions are accounted for using the prospective method.

The Company anticipates investment income as a factor in the premium deficiency calculation.

## NOTES TO FINANCIAL STATEMENTS

Loss and loss adjustment expense reserves are estimates that provide for the ultimate expected cost of settling unpaid losses and claims reported at each balance sheet date. Losses and claims incurred but not reported, as well as expenses required to settle losses and claims, are established on the basis of various criteria, including historical cost experience and anticipated costs of servicing reinsured and other risks. Considerable judgment is required to evaluate claims and establish estimated claim liabilities, particularly with respect to certain lines of business, such as reinsurance assumed, or certain types of claims, such as environmental and asbestos liabilities. The environmental and asbestos exposures do not lend themselves to traditional methods of loss development determination and, therefore, reserve estimates related to these exposures may be considerably less reliable than for other lines of business. The Company believes that overall reserving practices have been consistently applied, and that its aggregate net reserves have resulted in reasonable approximations of the ultimate net costs of claims incurred. These estimates are continually reviewed and adjusted as necessary; such adjustments are reflected in current operations. The Company's liability for unpaid loss and loss adjustment expense is presented net of amounts recoverable from reinsurers.

The Company is a member of an affiliated group of companies which file a consolidated federal income tax return. Under the terms of an intercompany tax allocation agreement, the Company is allocated federal income taxes by applying the current regular federal tax rate to statutory results of operations modified by book versus tax adjustments. Alternative minimum taxes are allocated ratably to companies with taxable income.

Realized capital gains and losses on the sale of investments are determined on a specific identification method and are included in the determination of net income. Unrealized capital gains and losses resulting from changes in the valuation of investments at fair value are credited or charged directly to surplus.

The Company regularly evaluates investments based on current economic conditions, credit risk experience and other circumstances of the underlying securities. A decline in a security's net market value that is not a temporary fluctuation is recognized as a realized loss, and the cost basis of that security is reduced.

Premiums earned, loss and loss adjustment expenses incurred, unearned premiums, and the liability for losses and loss adjustment expenses are reflected net of reinsurance assumed from and ceded to other companies.

Land, building and equipment are carried at cost less accumulated depreciation and are reflected net of encumbrances. Depreciation is calculated on a straight-line basis over the allowable estimated useful lives of the assets.

The assets and liabilities of operations with foreign functional currencies are translated net into U.S. dollars at current exchange rates and the resulting adjustment recorded is reflected as a liability in the statutory financial statements. The resulting net translation adjustments for each period are included in surplus.

It combines the effects of interest rates, volatility, and prepayment speeds based on Monte Carlo simulation with credit loss analysis and resulting effective analytics (spreads, duration, convexity) and cash-flows are reported to clients on a monthly basis. Model assumptions are specific to asset class and collateral types and are regularly evaluated and adjusted where appropriate.

## NOTES TO FINANCIAL STATEMENTS

**Note 12 - Retirement Plans, Deferred Compensation, Postemployment Benefits and Compensated Absences and Other Postretirement Benefit Plans**

## A. Defined Benefit Plan and Postretirement Benefits

The Company, on behalf of employees of itself and employees of all subsidiaries, sponsors a defined benefit pension plan which covers substantially all employees hired before April 1, 2003, and provides pension and death benefits. The funding policy is to accrue and pay an amount sufficient to fund the minimum amount that can be deducted for federal income tax purposes which considers the annual current service cost on an annual basis, and an amount needed to amortize the plan's unfunded accrued liability over a seven year period. In addition, the Company sponsors and has accrued for a noncontributory executive retirement benefit for a former employee.

Effective April 1, 2004, the Company announced a freezing of its defined benefit pension plan.

A summary of total assets, total obligations and assumptions of the Pension Benefit Plan follows, at December 31, 2013 and 2012, respectively. The Company shares in the 100% Plan costs disclosed below, based on its 12% share of pooled expense.

The Company's Postretirement Benefit Plan was terminated on December 31, 2003. There are no assets or obligations to report.

On May 27, 2004, the Board of Directors with the concurrence of shareholders voted to place the Company into self-administered managed runoff status. These actions were taken in response to declines in financial strength ratings and the inability to raise capital. The Company prepared a runoff plan which called for the cessation of writing new and renewal business at the earliest possible date. The runoff plan also calls for the Company to maintain sufficient staffing to perform all required functions related to policyholder services, billing and collection, claims administration and financial reporting. The Company is providing periodic updates to its domiciliary regulators.

F. Subprime Mortgage Exposure

The Company does not engage in subprime residential mortgage lending. The Company's exposure to subprime lending is limited to investments within the fixed maturity investment portfolio which contains securities collateralized by mortgages that have characteristics of subprime lending such as adjustable rate mortgages and alternative documentation mortgages. These investments are in the form of asset-backed securities (ABS) collateralized by subprime mortgages and collateralized mortgage obligations backed by alternative documentation mortgages. The total carrying value of these investments is approximately \$25,900, comprising approximately 0.1% of the Company's total fixed maturity portfolio.

The Company has an unsecured aggregate recoverable for losses, paid and unpaid including IBNR, loss adjustment expenses and unearned premium with its parent, Providence Washington Insurance Company, that exceeds 3% of the policyholders' surplus. B. Reinsurance Recoverable in Dispute for the Year Ended December 31, 2013.

The Company does not have reinsurance recoverable for paid losses and loss adjustment expenses that exceed 5% of policyholders' surplus for an individual reinsurer or 10% of policyholders' surplus in aggregate.

Note 24 - Retrospectively Rated Contracts

None

Note 25 - Change in Incurred Losses and Loss Adjustment Expenses

During 2013, the Company has recorded its pool percentage (12%) share of total prior year development totaling \$20.6 million. The Company entered self-administered runoff in May 2004. Due to the uncertainties associated with runoff, the Company previously adopted a prudent and conservative practice of recording loss and loss adjustment expense reserves over and above the Appointed Actuary's central estimate. During the ensuing years subsequent to runoff, the loss and loss adjustment expense reserves have behaved in a generally predictable manner and developed favorably. The Company began recording its loss and loss adjustment expense reserves to the Appointed Actuary's central estimate commencing with year-end 2008. That practice remains in effect for 2013. The lines of business experiencing the largest amount of development are Commercial Multi-Peril (\$2.9 million) and Other Liability (\$0.9 million).

The largest contributor to the \$20.6 million of incurred loss and loss adjustment expense was an increase in the Adjusting and Other reserves of \$14.4 million. This provision was increased as the result of a broad-based projection of operating expenses and payout patterns for existing reserves.

The Company does not have a material amount of retrospectively rated policies and accordingly no adjustments were made to premiums.

**NOTES TO FINANCIAL STATEMENTS**

**Note 26 - Intercompany Pooling Arrangements**

A new pooling arrangement was established effective January 1, 1995. The lead company is Providence Washington Insurance Company and participation percentages are:

<u>Company</u>	<u>NAIC Co. Code</u>	<u>Percentage</u>
Providence Washington Insurance Company	24295	88%
York Insurance Company	24325	12%

All lines of business and all types of business are subject to the pooling agreement. Prior to calculating the pooled results by company, all cessions to non-affiliated reinsurers of business subject to pooling are recorded on the books of the lead company. All participants in the pooling agreement are parties to the reinsurance agreements with non-affiliated reinsurers. The pooled parties have assigned and transferred all non-affiliated reinsurance rights and obligations to the pool's lead company per the terms of the pooling agreement. The provision for reinsurance (Schedule F - Part 8) is recorded in full on the books of the lead company in conformance with all non-affiliated ceded reinsurance being recorded on the lead company's books. The write-off of uncollectible reinsurance is shared by pool members in accordance with pooling participation percentages.

NOTES TO FINANCIAL STATEMENTS

**Note 32 - Discounting of Liabilities for Unpaid Losses or Unpaid Loss Adjustment Expenses**

The Company's liabilities for unpaid workers' compensation claims are discounted on a consolidated basis with affiliated companies and then pooled among the affiliated companies. Reserves for the indemnity portion of workers compensation claims have been discounted on a tabular basis using NCCI tables at 3.5%. In total, the December 31, 2013 and December 31, 2012 liabilities include \$233,280 and \$253,920 of indemnity discount, respectively. The amount of discount for Case versus IBNR indemnity reserves at December 31, 2013 is as follows:

NOTES TO FINANCIAL STATEMENTS

Note 33 - Asbestos/Environmental Reserves

The Company has exposure to environmental and asbestos claims. All such exposures from all affiliates are pooled together and then allocated back to the separate companies based on their participation percentages in the pooling arrangement. The Company's environmental and asbestos exposure arises from the Group's past sale of General Liability, Commercial Multi-Peril, and Commercial Automobile insurance as well as from past participation in Assumed Reinsurance Pools. Regarding the direct exposure, the Group estimates the full impact of the environmental and asbestos exposure by establishing full case-basis reserves on all known claims and by computing incurred but not reported losses based on historical experience.

As respects the environmental and asbestos liability arising from assumed reinsurance, the Group was a participant in a pool of approximately fifty assumed reinsurance treaties which were discontinued in 1987. One of these treaties involves a small share of the ECRA pool. The participation in each treaty, although small (ranging from one-half of one percent to four percent), varied substantially by year with not all treaties being in-force for all years.

- A. Does the company have on the books, or has it ever written an insured for which you have identified a potential for the existence of a liability due to asbestos losses? Yes

The Company tries to estimate the full impact of the asbestos exposure by establishing full case basis reserves on all known losses and computing incurred but not reported losses based on previous experience.
